Portfolio Content Map

FlyRank Internship • Week 03 • Adarsh Reddy G

Portfolio claim and audience

Claim: I build practical AI/ML applications with Python and communicate technical work through clear experiments, useful tools, and evidence-based case studies.

Audience: AI/ML engineering managers and technical recruiters evaluating internship candidates.

Home page

Order: hero with name and claim; featured projects; skills supported by evidence; short About section; contact links.

Primary CTA: View projects. **Secondary CTA:** Contact me.

Projects and case studies

Order: problem; data/inputs; approach and technical decisions; evaluation and results; limitations; lessons and next steps; code/demo links.

Primary CTA: Read the case study. **Secondary CTA:** View source code.

About and Contact

About: concise introduction, current learning focus, relevant coursework, and professional links.

Contact: brief invitation plus email and professional profile links. CTA: Email me.

Evidence to collect

Real project screenshots or demos; repository links and clear READMEs; measured results with methods and caveats; verifiable certificates/awards where relevant; professional contact link.

Content rules

Do not claim unmeasured results. Label prototypes and learning projects honestly. Prefer evidence and code links over generic skill claims. Keep typography, palette, and spacing consistent.
